THE AURORA LEGACY

The mobile Escape Game for home or for remote team events!

In our first mobile home escape game - "The Aurora Legacy" - players take on the role of investigators and try to stop a gang of criminals. This involves deciphering codes in video messages, researching the Internet and cracking logic puzzles. The game was designed for playing at home but can also be used in remote team events.

Are you interested? This is what awaits the player in the "Aurora Legacy":

The Story

The precious Aurora Diamond has been stolen. The criminal Fox Gang seems to be behind the robbery, but has covered their tracks very well.

The only chance of success is an encrypted database found in the fox's lair. Apparently he has stored the instructions to his henchmen where the diamond should be hidden after the robbery.

And this is where the player comes in! The goal is to decipher the cryptic clues of the fox and find out where the Aurora Diamond could be!

The Field Of Use

"The Aurora Legacy" is the first mobile escape game based on espoto technology, which was not primarily designed for use in events. It is a classic home game for end customers (Individuals, families). But it can also be used in remote team events. The game comes with an entertaining story and does not require any materials at all!

The Key Data

- Between 60 - 90 minutes playing time!
- For 1 - 4 players aged 14 and up!
- More than a dozen different puzzles and an entertaining story!
- For beginners and advanced!
